Personal Profile

I am a hardworking, respectful and friendly person. I have a clear, logical mind with a practical approach to problem solving and I am committed to whatever I set my mind to. I can work independently and within a team setting. I have always had a passion for IT as I have completed many work experiences in previous years and have done personal work from home. I have completed an IT support role for a work experience to gain knowledge and experience in IT. The business was Finsbury and I worked with the IT team to provide support and help. I have also studied at home by doing personal work such as reading books and using websites like Udemy and Vision2learnt to gain more of an understanding of IT.

After completing my 2-year L3 Btec Business course in college, I have enrolled with an IT training provider called Just IT which is fully a self-funded programme. In this course, I learnt how to develop websites for business and personal use, using advanced HTML and CSS to make websites look pleasing. I have also learnt JavaScript to make websites more functional and responsive. I also learned ASP.NET, C# and SQL in order to get a good understanding of how the back end must be coded and designed. This has provided me with a greater perspective into the coding.

I am currently seeking a position in web development as a Junior Front-end Developer where I hope to expand my knowledge and put what I have learned into practice. Also, I would like to keep learning and improving to further develop my technical and soft skills as well as my knowledge in programming.

Education and IT Training

10/19-Present

Just IT Training Ltd, London
Development Professional Programme

- MTA Software Development Fundamentals (Expected 2020)
- CIW Advanced HTML5 & CSS3 Specialist 1D0-620 (Expected 2020)

- MCSD Developing ASP.NET MVC Web Application (Expected 2020)

09/17-06/19

Sir George Monoux College
L3 BTEC Business 90 Credit - Triple Distinction star (D*D*D*)

09/12-06/17

Willowfield Humanities College
GCSE: Achieved 5A* - C grades including in Maths and English

IT Skills

Software Development Skills: C#, ASP.NET, SQL

Web Technology: HTML, CSS, JavaScript & Bootstrap

Core Programming Languages: I see myself as a Front-end developer with some knowledge of Back-end languages. I want to specialise and focus on Front-end languages such as HTML, CSS & JavaScript as these are my strongest languages but also, I enjoy using them.

Projects: The first project is a JavaScript snake game that I created from scratch using a text editor called Brackets. I mainly used JavaScript but also used CSS to style it.

Bakery Website - I created this from scratch using HTML, CSS, JavaScript and implemented media queries to make it responsive on any device. I also used Brackets as my text editor.

Back-End game – This project was created in Visual studio 2017 and connected it to a MySQL database. I will also be creating more projects to show all the skills I have learnt.

Employment History

03/19-07/19

Sahara Grill
Waiter

- Serve customers and deal with complaints or questions that customers wanted to ask
- Work as part of the team to serve the customer as quickly as possible

Interests and Achievements

Computing: Most of my technical skills have been developed through self-study. Coding is one of my hobbies. I have used many different online resources for example Pluralsight, Code academy, and stack overflow to learn new skills and to continue to develop my skills. I have completed the 3 projects that I have mentioned above but I am now also working on completing more projects.

Hobbies: I am a very sporty person as I love to watch and play different sports such as football, cricket, badminton etc. Also, I have a gym membership as I like to keep fit and want to be as healthy as possible.
